

Key Points about Commonwealth Coordinated Care

The current
system has
gaps for
many
Virginians

Medicaid Enrollment vs. Spending

Why CCC?

- Coverage gaps & overlaps
- Cost shifting
- Lack of care coordination for many

Enter Commonwealth Coordinated Care

Person-centered care focused on needs and preferences

Same benefits currently available under Medicaid and Medicare + supplemental benefits

Single program with built-in Care Coordination for primary, preventive, acute, behavioral, and long-term services and supports

Promotes the use of **home- and community-based** behavioral and long-term services and supports

Promotes **improved transitions** between acute and long-term facilities

appeals

3

Designated
Care
Manager

5

Measures
and
improves
quality of
life

2

Reduced
duplication
of services

4

Eliminate
Cost Shifting

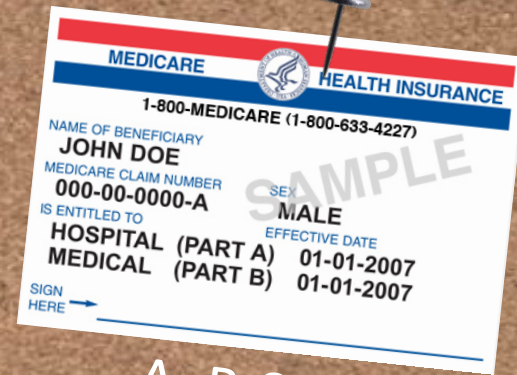

6

One card for
all benefits

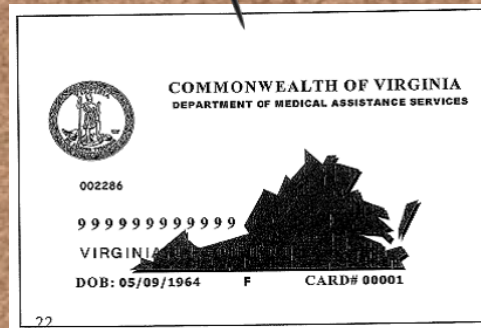

Commonwealth Coordinated Care
Medicare & Medicaid working together for you

3 Who is Eligible?

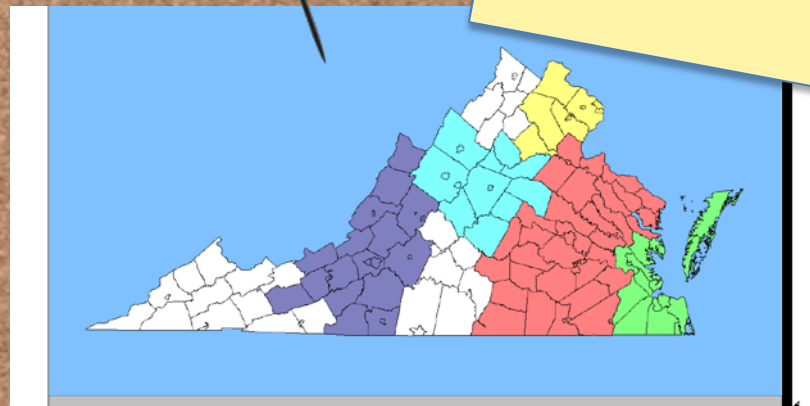

A, B & D

Full Benefit

21 and
Older

EDCD &
Nursing
Home
Residents

4 CCC Exempt

- Other waivers
- Hospice
- Other insurance
- To determine eligibility call MAXIMUS

There's a new partner in town- MMPs

- Medicare Medicaid Plan (MMP) is a payer and provider of care
- Signed three-way contracts with CMS/DMAS
- Responsible for Care Coordination
- Partners to quantify outcomes
- Provide Supplemental Services in addition to what is currently available to beneficiaries

What is Different after CCC Implementation?

Care Manager from the MMPs will complete the Health Risk Assessment

1

MMP Care Manager will coordinate with your staff to develop ICT

2

MMP Care Manager will work with your staff to coordinate appointments & services

3

Provider will bill MMP for services and work with MMP for future service authorizations

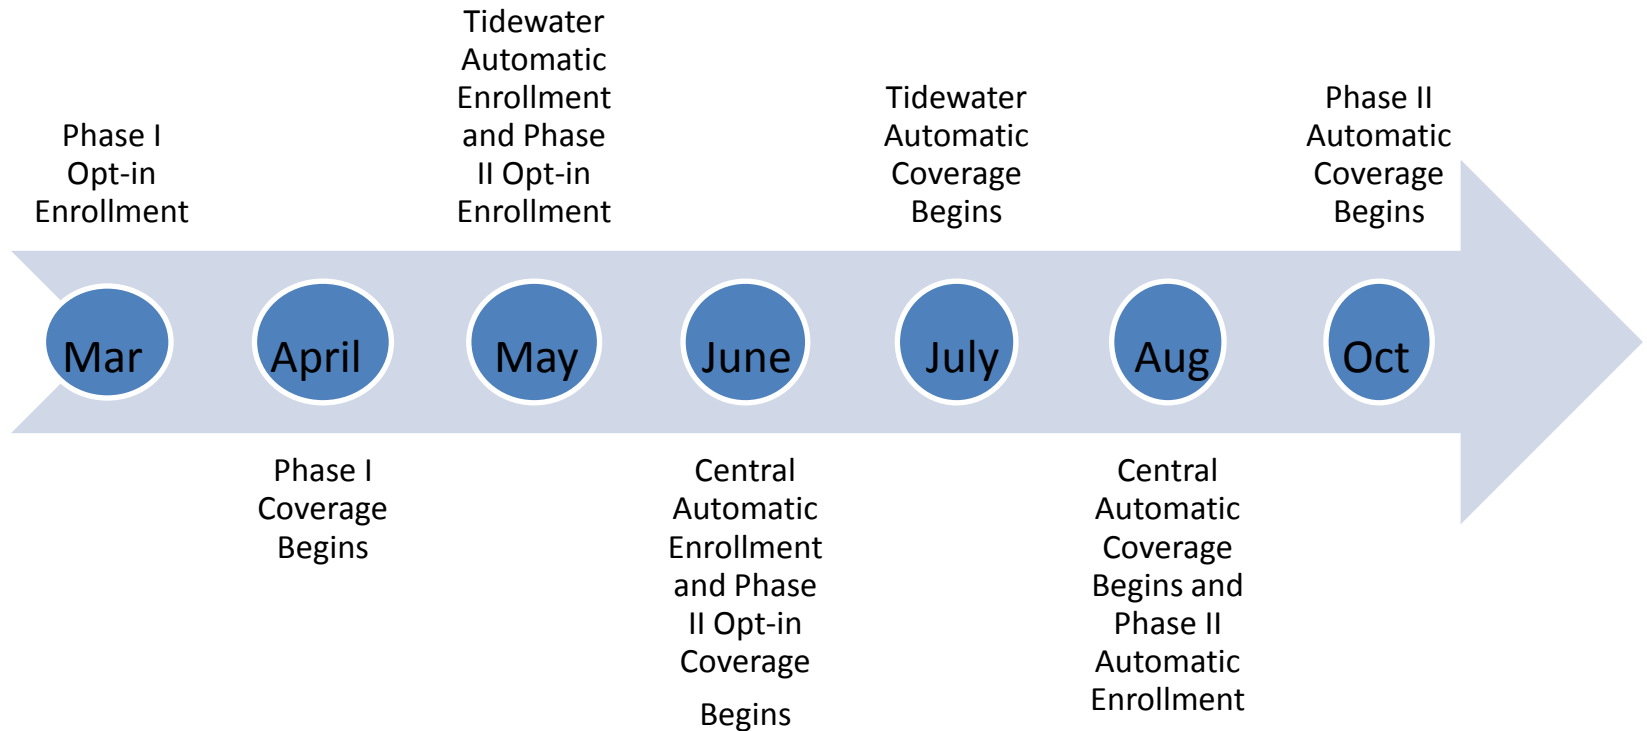

4

Transition Period

- 180 Days
- Sooner if prior authorization ends
- Bill MMP for services rendered regardless of network status

Implementation Timeline

Q&A Panel will
follow the
presentations
Thank You!
